

Homeowners Energy Efficiency Loan Program Report

This report is in response to a requirement of Act 1 of Special Session 1 (2007-2008), known as the Alternative Energy Investment Act. It describes the status of the Homeowner Energy Efficiency Loan Program (HEELP) as well as its successes and challenges.

The Legislature defined most of the parameters of the HEELP program in the Act. The legislatively mandated program characteristics of HEELP include loan usage (weatherization and energy efficient-type repairs and improvements), loan terms (10 years and a below market rate), an income limit of 150 percent of the greater of the area or statewide median income, and certain underwriting criteria (specifics within PHFA's discretion to determine). The Act also requires PHFA to develop a network of approved contractors to do HEELP work and specifies the standards that contractors must meet to be approved.

PHFA uses a total debt to income ratio of 45 percent (with exceptions possible, typically not exceeding 52 percent) and a Combined Loan to Value Ratio not to exceed 120 percent of home value); and an interest rate of 1 percent. A minimum credit score is not required in the HEELP program, although a credit report is obtained to review the applicant's credit history. The underwriting criteria are flexible compared to typical lending practices in order to benefit as many Pennsylvanians as possible. A common sense approach is utilized and full documentation of the borrower's income, assets and credit history is obtained in order to demonstrate an ability to repay the loan.

PHFA's main strategy in its first five years of operation was to use HEELP as a complement to the federal Weatherization Assistance Program because: (1) Weatherization funds often cannot cover all necessary repairs, most notably roofs, and (2) stimulus dollars were being directed to the Weatherization Program, so this was a prime opportunity to leverage that additional funding. The HEELP program continues to be in a position that allows for expansion of the state's array of state-and-federally supported Energy Efficiency programs to Pennsylvanians of all income levels now that stimulus dollars are no longer available. These programs include:

- **Weatherization grants-** The Weatherization Assistance Program is funded by the Department of Energy and passed through to the Department of Community and Economic Development and ultimately funds are moved to the Weatherization providers at the local level. Funding is limited to \$6,500 per home, so HEELP is able to bridge the gap for repairs that require more funding, such as roof replacement.
<http://newpa.com/programs/weatherization-assistance-program-wx/>
- **Federal Tax Credits-** The Residential Renewable Energy Tax Credit is funded through Federal funds. Eligible uses include solar water heat, photovoltaics, wind, fuel cells, geothermal heat pumps, and other solar technologies.
<http://www.energystar.gov/taxcredits>

This array provides Pennsylvanians with grants, loans, and tax credits to help pay for or reimburse them for general energy efficiency work (such as air sealing, insulation, heating system repair and/or replacement, minor repairs that allow Weatherization to occur, homeowner education), whole house (heating, cooling, insulation, and air sealing projects that are accompanied by a whole house energy audit), solar and geothermal heating.

HEELP loans strengthen offerings at the lower end of the income scale compared to typical financing options and tax credit incentives. The Agency has used these funds to support full Weatherization Assistance Program expenditures and to ensure that all Pennsylvanians have some type of option for home energy efficiency assistance.

PHFA encourages Community Action Provider (CAP) and Weatherization Agency Providers (WAP) involvement because they can provide homeowner education, suggest energy efficiency solutions, recognize reasonable costs, and help with contractor selection, and contractor oversight. CAP/WAP participation is voluntary, however, and there has been modest interest in participation in HEELP. Our participating agencies are to date:

- ACTION-Housing, Inc.
- Fayette County Redevelopment Authority
- Habitat for Humanity of Greater Pittsburgh
- Housing Development Corp. of Northeast PA
- Philadelphia Neighborhood Housing Services
- Scranton- Lackawanna Human Development Agency

PHFA continues to make outreach through CAP/WAP professional associations and directly to potential local program administrators.

Program Statistics

As of November 1, 2015, 511 loans have been approved out of a total of 1,562 applications received, for an approval rate of 30 percent. While this may seem low, this approval rate is due to the majority of applicants not being able to afford any additional debt, even a payment of \$88 a month for a \$10,000, 1% interest rate loan.

Appendix A is a list of all HEELP loans closed on or before November 1, 2015. The total number of closed loans as of November 1, 2015 is 394. The number of loan closings is less than approvals due to borrowers' need to select an approved contractor's estimate in a timely manner so that the loan can be closed in an amount sufficient to cover the needed work. Contractors often must become approved to perform this work.

Energy Savings

In an effort to keep origination/operation costs to a minimum, PHFA has attempted to use existing energy savings reports wherever possible. For this reason, the Agency intended to use energy efficiency information already gathered by CAPs/WAPs, thus saving the \$250 to \$400 projected cost of energy audits for each household. As borrowers were approved for loans, however, it became apparent that very little energy savings data for these households would be available. Many borrowers had had weatherization work done to their home prior to recent federal testing requirements and were using HEELP loans to finish installing energy efficiency items that had been recommended to them and to repair or replace roofs. Also, approximately fifty-six percent of the borrowers were working independently of an assistance agency.

Roofs are an interesting aspect of the HEELP program. Two hundred and forty of the 394, or 61 percent, of the HEELP loans closed as of November 1 have had roof replacement or repair as the largest single expenditure of the loan. Roof repair is a common barrier to weatherization grant work being performed and maintaining homeowner's insurance as well.

Now at the end of HEELP's fifth year, PHFA continues to confront the "post-install" data issue as it impacts the Agency's ability to report energy savings from HEELP work. Of the 163 loans included in our review period, loans closed prior to November 1, 2015, 75 have met their reporting requirements at their respective reporting phase, 30 have not responded to Agency requests for all or a portion of energy information, and 58 are either not six months out from their installation date and do not yet owe the Agency usage information or have not completed construction as of the reporting date.

Actual responses to the energy usage submission requirements indicate that many borrowers are not bothering to meet their obligation to provide usage information despite repeated Agency efforts via telephone and mail (and email if available) to procure the data.

Appendix B- Table 1 (Change in Reported Energy Usage- Borrowers with Pre and Post Data Only) summarizes for each borrower their average Electric, Gas, and Fuel Oil consumption for the months prior to installation and post-installation, if available. For example, Borrower 146's data is for the twelve months prior to their date of application for pre-install data and twelve months after their work was completed for post-install. The responses received often show energy use increases rather than reductions, which typically indicates a more severe winter and other behavioral changes by borrowers. Again, it also reflects that the majority of work paid for with HEELP loans: i.e. roofs typically have little impact on reducing energy usage but are vital home maintenance repairs. Appendix B- Table 2 summarizes energy usage information received from all borrowers with closed loans- even those not reporting post-install data.

The success of the HEELP loan is best measured in three ways: its ability to help Commonwealth citizens' help themselves to meet their housing needs; its availability to support Weatherization programs; and its role, supporting lower-income Pennsylvanians, in the array of energy efficiency programs within the state.
