

I love my new home! I didn't anticipate purchasing a home as a single person, and buying my dream home seemed like a difficult proposition on one income. I am grateful a lender told me about the PHFA loan with a lower interest rate than other programs on the market. It allows me to make a lower monthly payment, putting the house I always imagined within reach!

After putting lots of color on almost every wall in the house (yellow, pink, purple, green and blue) and a house warming party with 38 of my friends, my house feels like home. I love spending time there, and at least for now, the travel bug has left me! I'd much rather be home than gallivanting around the world as I'd been doing the last seven years. My home is a place where I am most comfortable and my friends are always welcome. I look forward to many more years at home, relaxing by the fireplace, playing lawn games in nice weather, and pool or ping pong in the basement when the weather isn't so nice. My house is my home and I couldn't be happier!
